Text 1

第 1 段

Everybody loves a fat pay rise. Yet pleasure at your own can vanish if you learn that a colleague has been given a bigger one. Indeed, if he has a reputation for slacking, you might even be outraged. Such behaviour is regarded as "all too human", with the underlying assumption that other animals would not be capable of this finely developed sense of grievance. But a study by Sarah Brosnan and Frans de Waal of Emory University in Atlanta, Georgia, which has just been published in Nature, suggests that it is all too monkey, as well.

直译：人人都喜欢大幅加薪。然而，如果得知同事加得更多，你对自己加薪的喜悦就可能消失。事实上，如果那位同事素来以偷懒闻名，你甚至可能愤怒。这类行为被认为 " 太有人性了 "，其背后的假定是，其他动物不可能具有如此精细发展的委屈感。然而，佐治亚州亚特兰大埃默里大学的萨拉 · 布罗斯南和弗兰斯 · 德瓦尔刚在《自然》发表的一项研究表明，这种行为也 " 太有猴性了 "。

第 2 段

The researchers studied the behaviour of female brown capuchin monkeys. They look cute. They are good-natured, co-operative creatures, and they share their food readily. Above all, like their female human counterparts, they tend to pay much closer attention to the value of "goods and services" than males.

直译：研究者考察了雌性褐卷尾猴的行为。它们外表可爱，性情温和，善于合作，也乐于分享食物。尤其是，像人类女性一样，它们往往比雄性更密切地关注 " 商品和服务 " 的价值。

第 3 段

Such characteristics make them perfect candidates for Dr. Brosnan's and Dr. de Waal's study. The researchers spent two years teaching their monkeys to exchange tokens for food. Normally, the monkeys were happy enough to exchange pieces of rock for slices of cucumber. However, when two monkeys were placed in separate but adjoining chambers, so that each could observe what the other was getting in return for its rock, their behaviour became markedly different.

直译：这些特征使它们成为两位博士研究的理想对象。研究者花了两年，教猴子用代币交换食物。通常，猴子很乐意用石块交换黄瓜片。然而，当两只猴子被放在分开但相邻的笼室里，能够各自看到对方用石块换到了什么时，它们的行为就明显不同了。

第 4 段

In the world of capuchins grapes are luxury goods (and much preferable to cucumbers). So when one monkey was handed a grape in exchange for her token, the second was reluctant to hand hers over for a mere piece of cucumber. And if one received a grape without having to provide her token in exchange at all, the other either tossed her own token at the researcher or out of the chamber, or refused to accept the slice of cucumber. Indeed, the mere presence of a grape in the other chamber (without an actual monkey to eat it) was enough to induce resentment in a female capuchin.

直译：在卷尾猴的世界里，葡萄是奢侈品，比黄瓜受欢迎得多。因此，当一只猴子交出代币换到葡萄时，第二只猴子就不愿意仅为一片黄瓜交出自己的代币。而如果一只猴子根本不必交出代币就得到葡萄，另一只就会把自己的代币扔向研究者或扔出笼室，或者拒绝接受黄瓜片。事实上，哪怕另一笼室仅仅出现一颗葡萄 —— 没有真正的猴子去吃它 —— 就足以引起一只雌性卷尾猴的不满。

第 5 段

The researchers suggest that capuchin monkeys, like humans, are guided by social emotions. In the wild, they are a co-operative, group-living species. Such co-operation is likely to be stable only when each animal feels it is not being cheated. Feelings of righteous indignation, it seems, are not the preserve of people alone. Refusing a lesser reward completely makes these feelings abundantly clear to other members of the group. However, whether such a sense of fairness evolved independently in capuchins and humans, or whether it stems from the common ancestor that the species had 35 million years ago, is, as yet, an unanswered question.

直译：研究者认为，卷尾猴与人一样，受到社会情绪的引导。在野外，它们是合作性群居物种。只有每只动物都觉得自己没有受骗，这种合作才可能稳定。看来，义愤并非人类专有。完全拒绝较差的报酬，会向群体中的其他成员非常清楚地传达这些感受。然而，这种公平感是在卷尾猴和人类中各自独立进化而来，还是源自两者 3500 万年前的共同祖先，目前仍是一个没有答案的问题。

篇章简析

主旨：实验提示卷尾猴也会对不平等回报产生不满，但公平感的进化来源尚未解决。第 4 段区分两种条件：另一只得到更好报酬、另一只不付代价就得到报酬。末句 whether ... or whether ... 构成两个并列待解假说。

Text 2

第 1 段

Do you remember all those years when scientists argued that smoking would kill us but the doubters insisted that we didn't know for sure? That the evidence was inconclusive, the science uncertain? That the antismoking lobby was out to destroy our way of life and the government should stay out of the way? Lots of Americans bought that nonsense, and over three decades, some 10 million smokers went to early graves.

直译：你还记得那些年吗？科学家说吸烟会害死我们，怀疑者却坚持说，我们还不能确定；他们说证据不充分，科学结论不确定；他们说反吸烟游说团体意在摧毁我们的生活方式，政府应当不要插手。许多美国人相信了这套胡话，于是在三十年间，大约 1000 万吸烟者过早死去。

第 2 段

There are upsetting parallels today, as scientists in one wave after another try to awaken us to the growing threat of global warming. The latest was a panel from the National Academy of Sciences, enlisted by the White House, to tell us that the Earth's atmosphere is definitely warming and that the problem is largely man-made. The clear message is that we should get moving to protect ourselves. The president of the National Academy, Bruce Alberts, added this key point in the preface to the panel's report: "Science never has all the answers. But science does provide us with the best available guide to the future, and it is critical that our nation and the world base important policies on the best judgments that science can provide concerning the future consequences of present actions."

直译：今天存在令人不安的类似情形：科学家一批接一批地试图使我们意识到全球变暖日益加剧的威胁。最新的一批是应白宫邀请成立的美国国家科学院专家组，它告诉我们，地球大气确实正在变暖，而问题在很大程度上由人类造成。明确的信息是，我们应该开始行动，保护自己。科学院院长布鲁斯·艾伯茨在报告序言中补充了这个关键点："科学从来不会拥有所有答案。但科学确实能为未来提供我们现有的最佳指引；我国和全世界必须根据科学就当前行动未来后果所能作出的最佳判断，制定重要政策。"

第 3 段

Just as on smoking, voices now come from many quarters insisting that the science about global warming is incomplete, that it's OK to keep pouring fumes into the air until we know for sure. This is a dangerous game: by the time 100 percent of the evidence is in, it may be too late. With the risks obvious and growing, a prudent people would take out an insurance policy now.

直译：就像当年吸烟问题一样，现在来自许多方面的声音坚持说，全球变暖的科学研究尚不完整，在我们确定之前，继续向空气中排放烟气也没关系。这是危险的游戏：等到百分之百的证据齐备时，可能已经太迟。风险已经明显，而且还在增加，审慎的人民现在就会给自己买一份保险。

第 4 段

Fortunately, the White House is starting to pay attention. But it's obvious that a majority of the president's advisers still don't take global warming seriously. Instead of a plan of action, they continue to press for more research—a classic case of "paralysis by analysis".

直译：幸运的是，白宫开始重视了。但很明显，总统的大多数顾问仍未认真看待全球变暖。他们继续要求更多研究，而不提出行动计划 —— 这是一个典型的 " 因分析而瘫痪 " 的例子。

第 5 段

To serve as responsible stewards of the planet, we must press forward on deeper atmospheric and oceanic research. But research alone is inadequate. If the Administration won't take the legislative initiative, Congress should help to begin fashioning conservation measures. A bill by Democratic Senator Robert Byrd of West Virginia, which would offer financial incentives for private industry, is a promising start. Many see that the country is getting ready to build lots of new power plants to meet our energy needs. If we are ever going to protect the atmosphere, it is crucial that those new plants be environmentally sound.

直译：要成为负责任的地球管理者，我们必须推进更深入的大气和海洋研究。但仅有研究是不够的。如果政府不主动推动立法，国会就应帮助开始制定保护措施。西弗吉尼亚州民主党参议员罗伯特·伯德提出的一项法案，将为私营企业提供经济激励，这是一个有希望的开端。许多人看到，国家正准备建设大量新电厂来满足能源需求。如果我们真要保护大气，让这些新电厂在环境方面可靠、无害，就是至关重要的。

篇章简析

主旨：气候研究仍有不确定性，不构成拖延防范行动的充分理由。文章以吸烟争议作类比，主张研究与行动并行。insurance policy 是预防风险的比喻；作者没有主张停止研究。政策与机构态度按历史原文理解。

Text 3

第 1 段

Of all the components of a good night's sleep, dreams seem to be least within our control. In dreams, a window opens into a world where logic is suspended and dead people speak. A century ago, Freud formulated his revolutionary theory that dreams were the disguised shadows of our unconscious desires and fears; by the late 1970s, neurologists had switched to thinking of them as just "mental noise"—the random byproducts of the neural-repair work that goes on during sleep. Now researchers suspect that dreams are part of the mind's emotional thermostat, regulating moods while the brain is "off-line." And one leading authority says that these intensely powerful mental events can be not only harnessed but actually brought under conscious control, to help us sleep and feel better. "It's your dream," says Rosalind Cartwright, chair of psychology at Chicago's Medical Center. "If you don't like it, change it."

直译：在一夜好眠的所有组成部分中，梦似乎最不受我们控制。在梦里，一扇窗通向一个逻辑暂停运作、死者能够说话的世界。一百年前，弗洛伊德提出革命性的理论，认为梦是潜意识欲望与恐惧经过伪装的影像；到 20 世纪 70 年代末，神经学家又转而把梦看成单纯的“精神噪声”，即睡眠期间神经修复工作的随机副产品。如今，研究者怀疑，梦是心灵情绪调节器的一部分，在大脑“离线”时调节情绪。一位主要权威人士说，这些异常强烈的心理活动，不仅可以被利用，甚至能够置于有意识的控制之下，以帮助我们睡得更好、感觉更好。芝加哥医疗中心心理学负责人罗莎琳德·卡特赖特说：“这是你的梦，如果你不喜欢它，就改变它。”

第 2 段

Evidence from brain imaging supports this view. The brain is as active during REM (rapid eye movement) sleep—when most vivid dreams occur—as it is when fully awake, says Dr. Eric Nofzinger at the University of Pittsburgh. But not all parts of the brain are equally involved; the limbic system (the "emotional brain") is especially active, while the prefrontal cortex (the center of intellect and reasoning) is relatively quiet. "We wake up from dreams happy or depressed, and those feelings can stay with us all day." says Stanford sleep researcher Dr. William Dement.

直译：脑成像证据支持这种看法。匹兹堡大学的埃里克·诺夫津格博士说，在快速眼动睡眠阶段——大多数生动的梦发生在此时——大脑和完全清醒时一样活跃。但并不是所有脑区都同样参与：边缘系统，即“情绪脑”，特别活跃，而前额叶皮质，即智力和推理的中心，相对安静。斯坦福大学睡眠研究者威廉·德门特博士说：“我们从梦中醒来时可能快乐或沮丧，而这些感受会伴随我们一整天。”

第 3 段

The link between dreams and emotions shows up among the patients in Cartwright's clinic. Most people seem to have more bad dreams early in the night, progressing toward happier ones before awakening, suggesting that they are working through negative feelings generated during the day. Because our conscious mind is occupied with daily life we don't always think about the emotional significance of the day's events until, it appears, we begin to dream.

直译：梦与情绪的联系，也体现在卡特赖特诊所的患者身上。大多数人似乎在夜间较早时做更多噩梦，醒来前逐渐转为更愉快的梦，这表明他们正在逐步处理白天产生的负面情绪。由于我们的意识忙于日常生活，我们并不总会思考当天事件的情感意义，直到——看来是如此——开始做梦时才这样做。

第 4 段

And this process need not be left to the unconscious. Cartwright believes one can exercise conscious control over recurring bad dreams. As soon as you awaken, identify what is upsetting about the dream. Visualize how you would like it to end instead; the next time it occurs, try to wake up just enough to control its course. With much practice people can learn to, literally, do it in their sleep.

直译：这一过程并不一定要交给潜意识。卡特赖特相信，人可以有意识地控制反复出现的噩梦。醒来后，立即辨认梦中究竟什么令人不安。想象你希望它怎样结束；下次这个梦出现时，试着只醒到足以控制梦的走向的程度。通过大量练习，人们能够学会，名副其实地，在睡梦中完成这件事。

第 5 段

At the end of the day, there's probably little reason to pay attention to our dreams at all unless they keep us from sleeping or "we wake up in a panic," Cartwright says. Terrorism, economic uncertainties and general feelings of insecurity have increased people's anxiety. Those suffering from persistent nightmares should seek help from a therapist. For the rest of us, the brain has its ways of working through bad feelings. Sleep—or rather dream—on it and you'll feel better in the morning.

直译：归根结底，卡特赖特说，我们也许根本没有多少理由关注自己的梦，除非它们使我们无法睡觉，或"我们在惊恐中醒来"。恐怖主义、经济不确定性和普遍的不安全感增加了人们的焦虑。那些持续受噩梦困扰的人应向治疗师求助。对其余人来说，大脑自有处理不良情绪的方法。睡一觉，或者更准确地说，为此做个梦，早晨你就会感觉好一些。

篇章简析

主旨：文章介绍梦可能参与情绪调节，并引述有意识干预噩梦的观点。第 1 段按时间梳理三种解释；第 2、3 段提供脑活动与临床观察。suspect、believes、probably 保留了推测性质，不能全译成已被证实。

Text 4

第 1 段

Americans no longer expect public figures, whether in speech or in writing, to command the English language with skill and gift. Nor do they aspire to such command themselves. In his latest book, Doing Our Own Thing: The Degradation of Language and Music and Why We Should Like, Care, John McWhorter, a linguist and controversialist of mixed liberal and conservative views, sees the triumph of 1960s counter-culture as responsible for the decline of formal English.

直译：美国人不再期待公众人物在讲话或写作时，能够熟练而富有才华地驾驭英语；他们自己也不再渴望达到这样的掌握程度。语言学家约翰·麦克沃特兼具自由派与保守派观点，常参与争论。在新书《做我们自己的事：语言和音乐的退化，以及我们为什么 —— 嗯 —— 应该在乎》中，他认为，20 世纪 60 年代反主流文化的胜利，应对正式英语的衰落负责。

第 2 段

Blaming the permissive 1960s is nothing new, but this is not yet another criticism against the decline in education. Mr. McWhorter's academic speciality is language history and change, and he sees the gradual disappearance of "whom", for example, to be natural and no more regrettable than the loss of the case-endings of Old English.

直译：责怪放任宽容的 60 年代并不新鲜，但这并非又一篇批评教育衰退的文字。麦克沃特的学术专长是语言历史与变化；例如，他认为 whom 的逐渐消失是自然的，并不比古英语格尾的消失更值得惋惜。

第 3 段

But the cult of the authentic and the personal, "doing our own thing", has spelt the death of formal speech, writing, poetry and music. While even the modestly educated sought an elevated tone when they put pen to paper before the 1960s, even the most well regarded writing since then has sought to capture spoken English on the page. Equally, in poetry, the highly personal, performative genre is the only form that could claim real liveliness. In both oral and written English, talking is triumphing over speaking, spontaneity over craft.

直译：但是，对真实感与个人性的崇拜 ——" 做我们自己的事 "—— 已经宣告正式演说、写作、诗歌和音乐的死亡。在 60 年代以前，即使受教育不多的人，落笔时也寻求一种庄重高雅的语调；而此后，就连最受推崇的文字，也力求把口头英语搬到纸上。同样，在诗歌中，高度个人化、重视表演的类型，是唯一能声称具有真正活力的形式。在口头和书面英语中，闲谈正战胜正式言说，自发性正战胜精心锤炼的技艺。

第 4 段

Illustrated with an entertaining array of examples from both high and low culture, the trend that Mr. McWhorter documents is unmistakable. But it is less clear, to take the question of his subtitle, why we should, like, care. As a linguist, he acknowledges that all varieties of human language, including non-standard ones like Black English, can be powerfully expressive: there exists no language or dialect in the world that cannot convey complex ideas. He is not arguing, as many do, that we can no longer think straight because we do not talk proper.

直译：麦克沃特用来自高雅与通俗文化的大量有趣例子加以说明，他所记录的趋势是清楚无误的。但用他副标题的问题来说，我们为什么 —— 嗯 —— 应该在乎，就不那么清楚了。作为语言学家，他承认，人类语言的所有变体，包括黑人英语这样的非标准变体，都可以具有强大的表达力；世界上不存在不能传达复杂思想的语言或方言。他并不像许多人那样主张，因为我们说话不规范，所以就不能清楚思考。

第 5 段

Russians have a deep love for their own language and carry large chunks of memorized poetry in their heads, while Italian politicians tend to elaborate speech that would seem old-fashioned to most English-speakers. Mr. McWhorter acknowledges that formal language is not strictly necessary, and proposes no radical education reforms—he is really grieving over the loss of something beautiful more than useful. We now take our English "on paper plates instead of china". A shame, perhaps, but probably an inevitable one.

直译：俄罗斯人深深爱着本国语言，脑中记着大段诗歌；意大利政治人物则倾向于精心铺陈演说，而这种演说在大多数英语使用者看来可能过时。麦克沃特承认，正式语言并非绝对必要，也没有提出激进的教育改革；他真正悲伤的，是失去了一种美的东西，而不是实用的东西。如今，我们用 " 纸盘子而不是瓷器 " 来盛装英语。也许令人遗憾，但恐怕不可避免。

篇章简析

主旨：评述正式英语衰退的文化原因与审美损失，同时区分语言形式变化与思考能力下降。作者认可书中记录的趋势，却质疑为何必须忧虑。末句纸盘与瓷器比喻表达风格的审美差别，不是表达复杂思想能力的绝对高下。

整理说明：依据所附年度试卷提取 Text 1–Text 4；每段英文后接中文直译。已修复明显断词、粘连、错字和标点损坏。文中数据、事件及观点均置于原文章的历史语境中理解。篇章简析为本次整理所加。
